Learning new technologies, Travel

Profile

An enthusiastic Full Stack Web Developer, specialized in MERN stack from Masai School. Having the knowledge to write web applications in Front-End and Back-End coding languages. Looking for a job opportunity to showcase one's skills in a technology-driven organization that would enhance one's career and technical knowledge.

Projects

1. Meesho.com clone 🔗
Deployed 🔗 | **GitHub** 🔗
Meesho is India's largest and most trusted marketplace for Resellers, who sell products online through WhatsApp and Facebook.
Features:
- Home Page, Sign-in, and Sign-up Pages
- Cart and Payment Pages
- Products Pages for men and women, Admin panel

Tech-stack: HTML | TypeScript | Chakra UI | React
Areas of responsibility:
- Built the products pages for men's and women's apparel
- Build the redux store to perform the CRUD actions

This project was built by a team of 4 in just 5 days.

2. Paytm Mall clone 🔗
Deployed 🔗 | **GitHub** 🔗
Paytm Mall is an Indian e-commerce website where one can shop for the desired product right from the comfort of their home and get them delivered straight to their doorstep.
Features:
- Sign-in Page, Sign-up Page
- Home Page, Navigation bar, Footer
- Admin and user controls
- Product Detail Page, Add to Cart

Tech Stack: HTML | JavaScript | React | Chakra UI
Areas of responsibility:
- Created a mock server for the data using render.com
- Built a product detail page
- Built some private pages/routes only for logged-in users

This project was individually built by me in just 5 days.
